PROFESSIONAL SUMMARY

Senior Full-Stack Engineer and Engineering Lead with 6+ years building high-stakes platforms across fintech, GovTech, and SaaS. Proven at scale: **520,000+** concurrent users, **₦500M+** in revenue generated, **99.99%** uptime on government-critical systems. Experienced in end-to-end system architecture, cross-functional team leadership (**4-5 engineers**), and shipping production-grade React, Next.js, Node.js, TypeScript, and Mobile applications. Currently leading platform engineering for 5+ Nigerian State ministries at GFA Technologies Group.

TECHNICAL SKILLS

Architecture & Design: System Design · Distributed Systems · Microservices · API Design & Governance · High-Concurrency Architecture · Serverless

Frontend: React.js · Next.js · TypeScript · Redux · Tailwind CSS · React Native · Flutter · Framer Motion · Vite

Backend & APIs: Node.js · Express · ASP.NET Core · RESTful APIs · WebSockets · Python (basic) · PHP · Java · C#

Database & Cloud: PostgreSQL · MongoDB · MySQL · Microsoft Azure · AWS · Docker · CI/CD Pipelines · Vercel · Render

Domain Expertise: Fintech · Payment Systems · Government Digital Transformation · SaaS · E-commerce · Platform Scalability

Leadership: Engineering Management · Technical Leadership · Cross-functional Collaboration · Mentoring · Product Strategy

PROFESSIONAL EXPERIENCE

Engineering Lead (Full-Stack & System Architecture), GFA Technologies Group

January 2026 – Present | Remote

Leading full-stack engineering and system architecture for government-facing softwares digitizing the workflow of 5+ Nigerian State ministries.

- Architected multi-ministry MDA digitization platforms, data models, API contracts, module boundaries, and integration patterns, driving a 40% increase in internally generated revenue within Q1 2026.
- Designed the concurrency model and data isolation strategy for platforms achieving 99.99% uptime under heavy government transaction loads, zero downtime during critical operational cycles.
- Mentored 4 junior engineers on system design principles and production code quality; served as primary technical decision-maker across all ministry deployments.
- Reported directly to C-suite on technical roadmap, delivery milestones, and platform risk.

Stack: React.js · Node.js · TypeScript · PostgreSQL · Microsoft Azure · Docker · CI/CD

Senior Software Engineer, Clearer

June 2025 – November 2025 | Contract

- *Re-engineered a fintech payment platform and led front-end architecture for a digital asset trading application.*
- Increased onboarding completion rate by 80% by redesigning the ClearerPay user flow architecture in Next.js and TypeScript, rebuilt from audit to shipped in one sprint cycle.
- Architected and built real-time dashboards rendering live OTC transaction data exceeding ₦20M daily; implemented optimistic UI updates and advanced error handling for sub-second UX under load.
- Led front-end architecture for Swetche, a digital asset app: multi-currency support, secure payment gateway integrations, and scalable component systems.

Stack: Next.js · TypeScript · ASP.NET Core · Node.js · React.js · REST APIs

Technical Lead, Product Development & Design, Dimpified (A subsidiary of GFA Technologies Group)

December 2024 – December 2025 | Remote

Defined architecture and led full-stack build of a vertical SaaS platform from zero to alpha launch.

- Defined MVP scope, system architecture, API contracts, and data models for a vertical SaaS platform serving service-based businesses, owning every technical decision from day one.
- Delivered the full Dimpified mobile app MVP using Flutter in 5 days, enabling early user testing and investor demonstration ahead of schedule.

- Prioritised 15+ industry-specific modules (appointments, order tracking, payments, booking) based on market research, reducing time-to-market by 40%.
- Led a team of 5: Software Engineers, UI/UX designers, and QA , boosted early user activation by 35% through high-performance dashboard architecture and optimised onboarding flows.

Stack: Flutter · React.js · Next.js · Node.js · TypeScript · PostgreSQL

Senior Software Engineer, GFA Technologies Group

July 2024 – November 2024 | Remote

- Engineered the LAG-UP and Gateway government skill acquisition platforms, integrating government APIs to process large-scale data and generate over ₦500M in revenue.
- Improved customer acquisition by 62% through enhanced UX patterns, reusable component libraries, and customisable templates deployed across multiple government-facing products.

Stack: React.js · Next.js · Node.js · TypeScript · REST APIs · CMS

Associate Software Engineer - Testing & Support, GFA Technologies Group

February 2024 – June 2024 | Remote

- Maintained FGN-ALAT and NYSC-ALAT upskilling portals supporting 520,000+ concurrent users with 99.9% uptime , one of the highest-scale platforms in the Nigerian public sector.
- Engineered a secure PDF generation pipeline for digital certificate issuance, eliminating manual bottlenecks and increasing user satisfaction scores.
- Established the end-to-end testing framework , reduced post-launch critical bugs by 85%.
- Implemented intelligent multi-step registration forms that cut user drop-off during onboarding by 43%.

Stack: React.js · Node.js · TypeScript · Jest · PDF pipeline

Frontend Engineer Intern, GFA Technologies Group

April 2023 – January 2024 | Internship

- Crafted a series of high-impact landing pages showcasing company products, directly contributing to the acquisition of 3 major corporate projects from banks and government.
- Overhauled the UI for the entire dashboard, login, and registration pages, significantly enhancing usability and aesthetics.
- Played a key role in revamping the GetFundedAfrica platform, systematically identifying and resolving bugs to optimize functionality and user experience.

Senior Frontend Engineer, Petabyte eSports

December 2024 – February 2025 | Contract

- Built the entire platform from scratch in 2 weeks , directly enabling the startup to secure seed funding.
- Achieved 27% load time reduction through systematic image optimisation and bundle analysis; maintained smooth performance on low-bandwidth mobile devices.

Stack: React.js · Framer Motion · TypeScript · Vite

Frontend Developer, Eunik Nigeria

April 2020 – December 2022 | Full-time

- Increased e-commerce conversion by 31% and reduced bounce rates by 22% through checkout flow optimisation and mobile responsiveness improvements.
- Maintained 99.9% uptime across weekly product catalog updates and interface releases.

Stack: JavaScript · Bootstrap · HTML/CSS

Notable Projects

EDUCATION

Bachelor of Science (B.Sc) in Computer Science, Al-Hikmah University

Ilorin, Kwara State, Nigeria

PROJECTS

Treeve - Rental SaaS Platform, Personal Project

- Solely designed, architected, and engineered the entire platform from scratch – built and deployed a serverless full-stack application while defining product vision, MVP scope, and user personas.
- Engineered a payment gateway integration enabling secure rent collection and automated transaction tracking, reducing rental transaction time from 14 days to 48 hours.
- Developed the product roadmap and single-handedly implemented all four MVP priorities: authentication, real-time listings, payments, and booking system.

NERD, Nigerian Education Repository and Databank

March 2025

- Developed high-performance landing pages optimized for SEO and WCAG 2.1 accessibility using HTML, custom CSS, JavaScript, and Tailwind.
- Implemented secure form handling and validation with Yup, plus real-time error feedback, improving completion rate by 28%.
- Collaborated with backend teams to ensure real-time data sync and rapid front-end integration.
